EVALORA AI

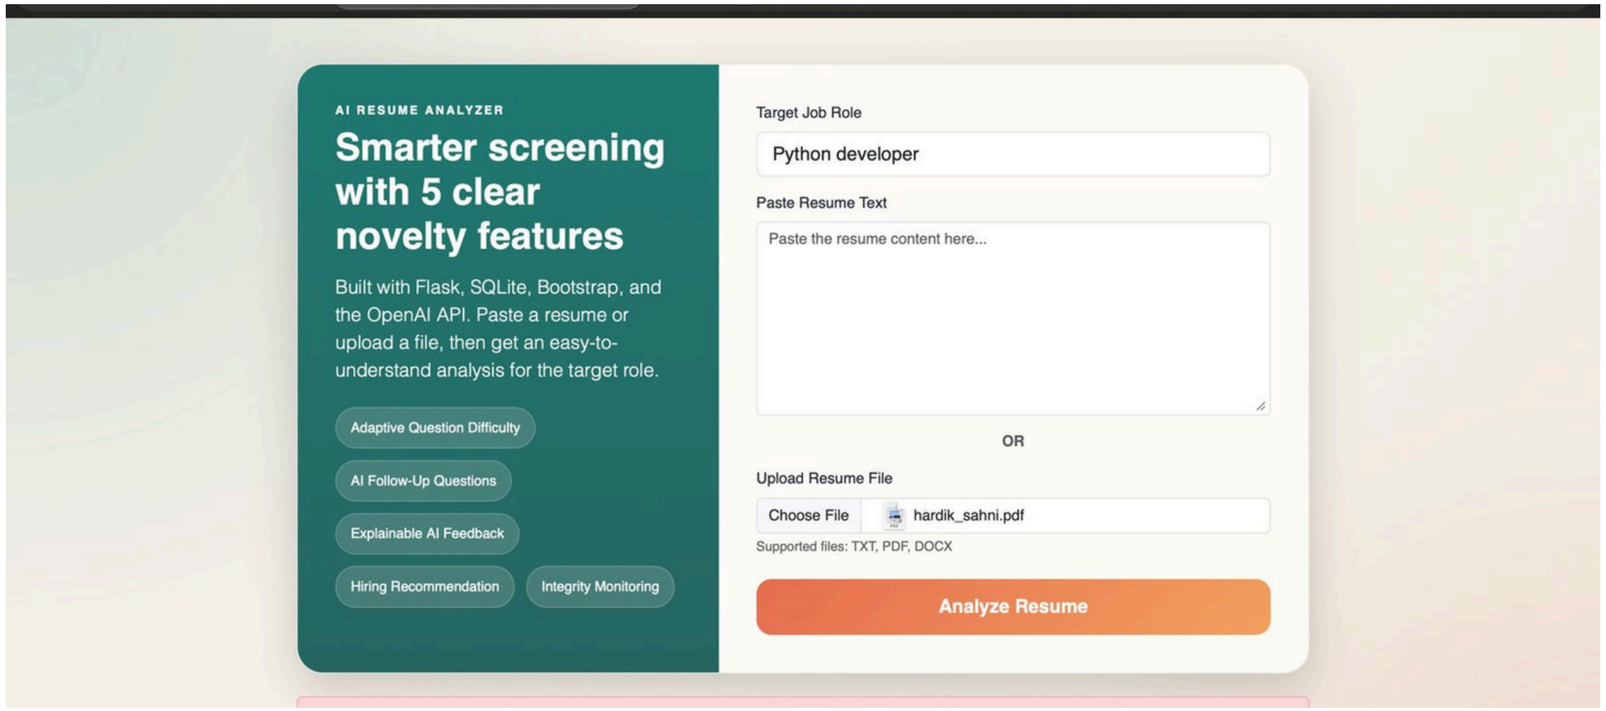
AI-POWERED INTELLIGENT HIRING SIMULATION SYSTEM

Team: Evalsync

RA2411003010003 - Aditi Krishna
RA2411003010005 - Hardik Sahni
RA2411003010061 - Aswathy Nair

INTRODUCTION

- HIRING IS A CRITICAL PROCESS IN ORGANIZATIONS
- TRADITIONAL SCREENING IS MANUAL AND INEFFICIENT
- EXISTING SYSTEMS RELY ON KEYWORD MATCHING (ATS)
- LACK OF INTELLIGENT DECISION-MAKING AND EXPLAINABILITY
- AI ENABLES AUTOMATION, INTELLIGENCE, AND SCALABILITY IN HIRING



ABSTRACT

- ACCEPTS RESUMES (PDF, DOCX, TXT)
- EXTRACTS AND PROCESSES UNSTRUCTURED DATA
- PERFORMS AI-BASED ANALYSIS USING STRUCTURED LOGIC
- GENERATES:
  - OVERALL SCORE
  - SCORE BREAKDOWN
  - STRENGTHS & WEAKNESSES
  - SKILL MATCH ANALYSIS
  - ADAPTIVE INTERVIEW QUESTIONS
  - HIRING RECOMMENDATION
- STORES RESULTS IN DATABASE FOR RECRUITER USAGE

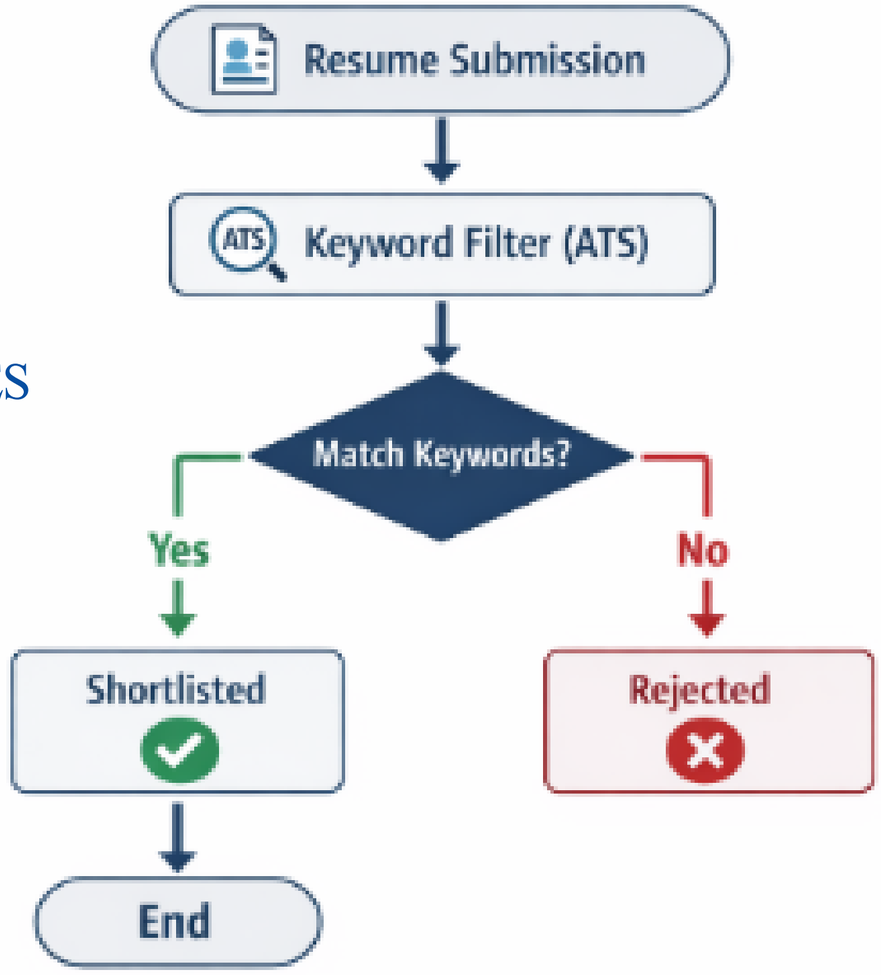
"PROVIDES EXPLAINABLE AI-DRIVEN HIRING DECISIONS."

EXISTING SYSTEM

- MOST ORGANIZATIONS USE MANUAL RESUME SCREENING
- APPLICANT TRACKING SYSTEMS (ATS) ARE WIDELY USED
- ATS SYSTEMS FILTER RESUMES BASED ON KEYWORDS
- SHORTLISTING DEPENDS ON PREDEFINED RULES
- RECRUITERS MANUALLY REVIEW SHORTLISTED CANDIDATES

LIMITATIONS:

- NO SKILL-LEVEL UNDERSTANDING
- NO PROJECT-BASED EVALUATION
- NO EXPLAINABILITY (BLACK-BOX DECISIONS)
- NO ADAPTIVE INTERVIEW SYSTEM
- NO CONFIDENCE SCORING
- NO RECRUITER-READY DASHBOARD



LITERATURE REVIEW

KEY FINDINGS FROM STUDIES

- AI CAN AUTOMATE RESUME SCREENING
- NLP TECHNIQUES HELP IN UNDERSTANDING TEXT
- MACHINE LEARNING MODELS CAN RANK CANDIDATES

GAPS IN EXISTING RESEARCH

- NO EXPLAINABLE AI (XAI)
- NO STRUCTURED SCORING MODEL
- NO ADAPTIVE QUESTIONING
- NO REAL-TIME RECRUITER INSIGHTS

HOW OUR WORK DIFFERS

- OUR SYSTEM IMPROVES ON EXISTING RESEARCH BY:
- PROVIDING EXPLAINABLE FEEDBACK
- GENERATING ADAPTIVE INTERVIEW QUESTIONS
- SIMULATING REAL RECRUITER DECISION-MAKING
- ADDING INTEGRITY MONITORING

"OUR SYSTEM INTEGRATES EXPLAINABLE AI + STRUCTURED SCORING + INTERVIEW INTELLIGENCE"

PROBLEM STATEMENT

- HIRING PROCESS IS SLOW DUE TO MANUAL SCREENING
- DIFFICULT TO IDENTIFY GENUINE SKILLS FROM RESUMES
- SYSTEMS RELY ONLY ON KEYWORD MATCHING
- LACK OF INTELLIGENT EVALUATION AND DECISION SUPPORT
- NO SYSTEM TO SIMULATE REAL RECRUITER BEHAVIOR
- NO STRUCTURED FEEDBACK FOR CANDIDATES
- NEED FOR AN AUTOMATED, INTELLIGENT, AND EXPLAINABLE SYSTEM

CHALLENGES

- EXTRACTING TEXT ACCURATELY FROM PDF, DOCX, TXT FILES
- HANDLING UNSTRUCTURED AND INCONSISTENT RESUME FORMATS
- IDENTIFYING RELEVANT SKILLS FROM RAW TEXT
- DESIGNING A FAIR AND BALANCED SCORING SYSTEM
- MATCHING RESUME CONTENT WITH JOB ROLES
- GENERATING MEANINGFUL INTERVIEW QUESTIONS
- ENSURING CONSISTENCY IN EVALUATION
- AVOIDING FALSE OR MISLEADING INFORMATION IN RESUMES

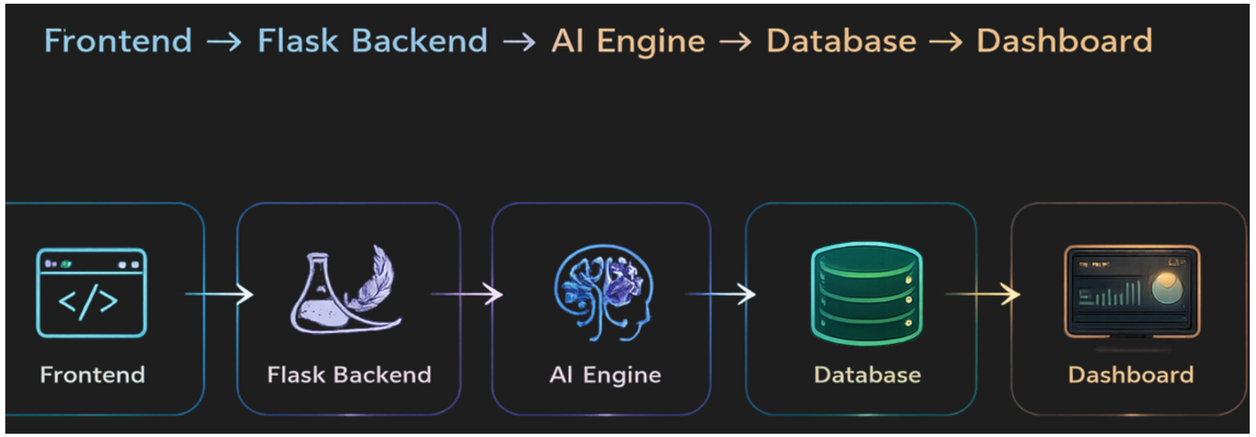
"NEED FOR AN INTELLIGENT, EXPLAINABLE, AND AUTOMATED HIRING SYSTEM."

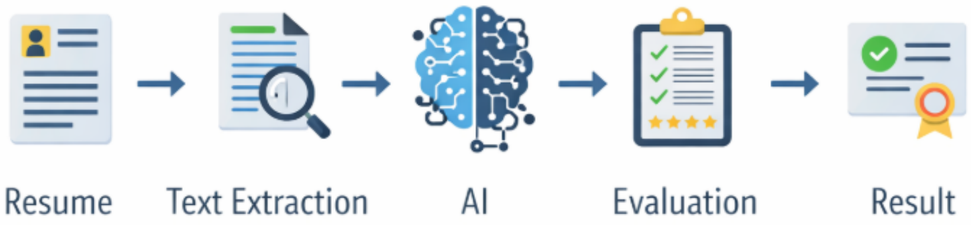
PROPOSED SYSTEM

1. USER UPLOADS RESUME
2. TEXT EXTRACTION (PDF / DOCX / TXT)
3. DATA CLEANING & STRUCTURING
4. AI + RULE-BASED ANALYSIS
5. SYSTEM GENERATES:

- **CANDIDATE SUMMARY**
- SCORE + SCORE BREAKDOWN
- SKILL MATCH ANALYSIS
- RESUME QUALITY (ATS SCORE)
- STRENGTHS & IMPROVEMENTS
- ADAPTIVE INTERVIEW QUESTIONS
- HIRING RECOMMENDATION

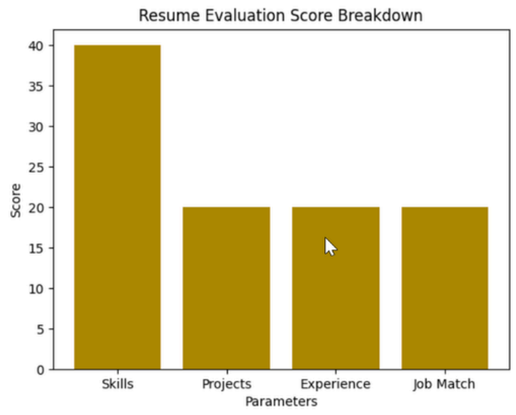
- 6. RESULTS STORED IN DATABASE

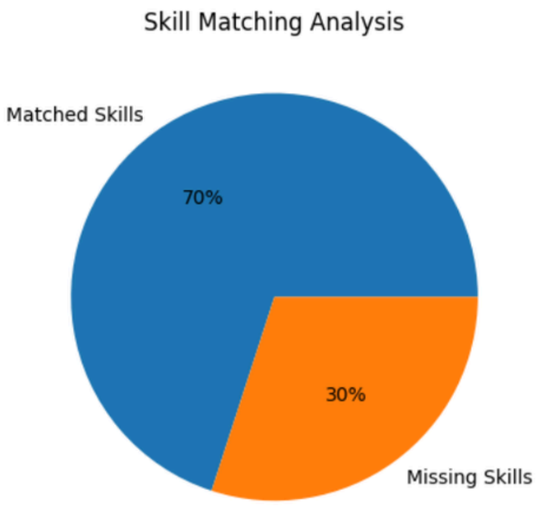




NOVELTY

- HYBRID SYSTEM (RULE-BASED + AI ANALYSIS)
- EXPLAINABLE AI (NOT BLACK-BOX DECISIONS)
- MULTI-FACTOR SCORING SYSTEM
- SKILL MATCH & GAP DETECTION
- RESUME QUALITY (ATS + CONFIDENCE SCORE)
- ADAPTIVE QUESTION DIFFICULTY (EASY / MEDIUM / HARD)
- AI-GENERATED FOLLOW-UP QUESTIONS
- RECRUITER DECISION SIMULATION
- STRUCTURED DASHBOARD OUTPUT





RESULT

SYSTEM OUTPUT:

- CANDIDATE SUMMARY
- OVERALL SCORE (0–100)
- SCORE BREAKDOWN
- STRENGTHS & IMPROVEMENTS
- SKILL MATCH ANALYSIS
- ATS SCORE & CONFIDENCE SCORE
- ADAPTIVE INTERVIEW QUESTIONS
- AI FOLLOW-UP QUESTIONS
- FINAL HIRING RECOMMENDATION

FUTURE ENHANCEMENTS

- REAL-TIME GROQ/OPENAI INTEGRATION
- RESUME RANKING SYSTEM
- MULTI-CANDIDATE COMPARISON
- AI CHATBOT FOR INTERVIEW SIMULATION
- VOICE-BASED INTERACTION
- FRAUD / FAKE RESUME DETECTION

COMPARISON

TRADITIONAL SYSTEM:

- USES KEYWORD FILTERING
- MANUAL DECISION-MAKING
- NO EXPLANATION
- NO QUESTION GENERATION
- LESS ACCURATE

PROPOSED SYSTEM:

- USES INTELLIGENT ANALYSIS
- AUTOMATED EVALUATION
- PROVIDES DETAILED FEEDBACK
- GENERATES INTERVIEW QUESTIONS
- MORE EFFICIENT AND CONSISTENT
